

IBRAHIM AHMED HUSSEIN

Frontend Developer

Cairo, Egypt | ibrahimahmed384888@gmail.com | +20 101 985 0179
GitHub | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Frontend Developer with **1+ year of professional experience** building responsive, high-performance web applications using **React.js, Next.js, Tailwind CSS, and Redux**. Currently employed as a Network Engineer while actively delivering production-ready frontend projects. Proven ability to optimize performance, improve user experience, and collaborate effectively with cross-functional teams. Seeking a frontend-focused role to contribute scalable, maintainable UI solutions.

PROFESSIONAL EXPERIENCE

Network Engineer

Indigo Intelligent Systems — Cairo, Egypt

October 2025 – Present

- Configured and maintained network infrastructure supporting 100+ endpoints, reducing downtime by 40% through proactive monitoring
- Administered Windows Server environments and applied IP management protocols, improving network efficiency by 25%
- Deployed security measures and firewall configurations, strengthening system protection against potential threats

Frontend Developer

Watanya Company For Roads — Nasr City, Egypt

September 2024 – September 2025

- Enhanced React.js and Next.js applications serving 5,000+ monthly users, reducing load times by 30%
- Built 15+ reusable UI components using Tailwind CSS and ES6+, accelerating feature development by 40%
- Collaborated with 3-person design team and 4 backend developers to deliver 8 production features on schedule
- Achieved WCAG 2.1 accessibility compliance to 95% and 98% cross-browser compatibility across Chrome, Firefox, and Safari

EDUCATION

Bachelor of Computer Science

Cairo Higher Institute for Engineering, Computer Science and Management

2019 – 2023

GPA: 3.6/4.0 | Graduation Project: Psychiatric Diagnosis System (Grade: Excellent)

TECHNICAL SKILLS

Frontend: JavaScript (ES6+), React.js, Next.js, Redux, HTML5, CSS3, Sass, Tailwind CSS

Backend & Database: Supabase, Firebase

Tools & Design: Git, GitHub, Figma, RESTful APIs, Agile Development

Additional: Windows Server, Network Configuration, IP Management, Performance Optimization

KEY PROJECTS

The Wild Oasis Website — Hotel Booking Platform

Technologies: Next.js, React.js, Tailwind CSS, Supabase

- Expanded customer-facing hotel booking website serving 2,000+ monthly visitors with real-time availability and secure reservation management
- Executed server-side rendering with Next.js, improving SEO rankings by 35% and page load speed by 45%
- Integrated Supabase backend for real-time data synchronization and user authentication with 99.9% uptime

Live Demo GitHub

The Wild Oasis Dashboard — Hotel Management System

Technologies: React.js, React Query, Supabase, Styled Components

- Built comprehensive admin dashboard managing 50+ cabin listings and 200+ monthly bookings with real-time analytics
- Enforced React Query for efficient data fetching, reducing API calls by 60% and improving dashboard responsiveness
- Designed role-based authentication system securing administrative access for 10+ team members

Live Demo GitHub (Test: test@gmail.com / test123456)

Fast React Pizza — Food Ordering Platform

Technologies: React.js, Tailwind CSS, Redux

- Improved dynamic cart management system with Redux, handling 1,000+ daily orders and real-time order tracking
- Designed fully responsive interface achieving 100% mobile compatibility and 50% increase in mobile conversions

Live Demo GitHub

usePopcorn — Movie Discovery Platform

Technologies: React.js, OMDB API, CSS3, Local Storage

- Created movie search platform integrating OMDB API with debounced search, reducing API calls by 70%
- Implemented persistent watchlist using localStorage, maintaining user data for 500+ active users
