PROFESSIONAL SUMMARY

Frontend Developer with 2+ years of professional experience designing and building responsive, high-performance web applications using React.js, Next.js, Tailwind CSS, and Redux. Demonstrated ability to optimize application performance, enhance user experience, and deliver production-ready solutions within cross-functional teams. Currently expanding expertise while actively contributing to real-world frontend projects, seeking a frontend-focused role to develop scalable, maintainable, and accessible UI solutions.

PROFESSIONAL EXPERIENCE

Frontend Developer

October 2025 – Present

Indigo Intelligent Systems, Cairo, Egypt

- Developed and maintained responsive web interfaces supporting 100+ concurrent users, reducing load time by 40% through performance optimization and lazy loading techniques
- Administered component architecture and executed state management protocols, improving application efficiency and scalability by 25%
- Deployed security best practices including input validation, XSS prevention, and Content Security Policy configurations, strengthening frontend application protection against common vulnerabilities

Frontend Developer

September 2024 – September 2025

Wataniya Company For Roads, Nasr City, Egypt

- Enhanced React.js and Next.js applications serving 5,000+ monthly users, reducing load times by 30%
- Built 15+ reusable UI components using Tailwind CSS and ES6+, accelerating feature development by 40%
- Collaborated with 3-person team and 4 backend developers to deliver 8 production features on schedule
- accomplished WCAG 2.1 accessibility compliance to 95% and 98% cross-browser compatibility across Chrome, Firefox, and Safari

EDUCATION

Bachelor of Computer Science

Cairo Higher Institute for Engineering, Computer Science and Management

2019 – 2023 | GPA: 3.6/4.0 | Graduation Project: Psychiatric Diagnosis System (Grade: Excellent)

TECHNICAL SKILLS

Frontend: JavaScript (ES6+), React.js, Next.js, Redux, HTML5, CSS3, Sass, Tailwind CSS

Backend & Database: Supabase, Firebase

Tools & Design: Git, GitHub, Figma, RESTful APIs, Agile Development

Additional: Windows Server, Network Configuration, IP Management, Performance Optimization

KEY PROJECTS

The Wild Oasis Website — Hotel Booking Platform

Technologies: Next.js, React.js, Tailwind CSS, Supabase

- Launched customer-facing hotel booking website serving 2,000+ monthly visitors with real-time availability and secure reservation management
- Implemented server-side rendering with Next.js, improving SEO rankings by 35% and page load speed by 45%
- Integrated Supabase backend for real-time data synchronization and user authentication with 99.9% uptime

[Live Demo](#) [GitHub](#)

The Wild Oasis Dashboard — Hotel Management System

Technologies: React.js, React Query, Supabase, Styled Components

- Built comprehensive admin dashboard managing 50+ cabin listings and 200+ monthly bookings with real-time analytics
- Used React Query for efficient data fetching, reducing API calls by 60% and improving dashboard responsiveness •
- Created role-based authentication system securing administrative access for 10+ team members

[Live Demo](#) [GitHub](#) (Test: test@gmail.com / test123456)

Fast React Pizza — Food Ordering Platform

Technologies: React.js, Tailwind CSS, Redux

- Developed dynamic cart management system with Redux, handling 1,000+ daily orders and real-time order tracking
- Designed fully responsive interface achieving 100% mobile compatibility and 50% increase in mobile conversions

[Live Demo](#) [GitHub](#)

Use Popcorn — Movie Discovery Platform

Technologies: React.js, OMDB API, CSS3, localStorage

- Generated movie search platform integrating OMDB API with debounced search, reducing API calls by 70%
- Enforced persistent watchlist using localStorage, serving user data for 500+ active users
